

SHRINE CATHOLIC HIGH SCHOOL AND ACADEMY

Future Problem Solvers – Shrine High School and Academy

Available to all current students

Future Problem Solving is a competitive, academic competition which helps students around the globe learn and apply the skills of creative problem solving. Students at Shrine Academy and High School can compete regionally, at the state Level for the State Bowl at MSU, and first place winners at State Bowl advance to the FPS International Competition.

Shrine has competed for the past 2 years with great success. We have had a First Place ranking at State Bowl for both team and individual, a Second place ranking at State for individual, a finalist at State Bowl for Scenario Writing, as well as a finalist for individual Problem Solving.

We currently practice 2-3 Mondays a month at Shrine Academy. If you would like more information about Future Problem Solving, please click the link below.

Club Moderator: Mary Leonard [\(248\)765-9334](tel:2487659334).
